

Lucky Alvin Peanut butter with sea salt

★ 1-Star

Very good nutty aroma and texture. Slightly runny in texture but grainy, making a slightly odd consistency. The peanuts are strong and the butter initially sticks to the mouth. This texture can be slightly off-putting, but the taste develops well and gives a really full eating experience.

A decent, fresh-flavoured peanut butter with a light toasted flavour. This tastes natural and unadulterated. The salt level is good - just enough to liven up and bring out the flavour of the peanut. The texture is smooth, and just a little claggy on the palate. We found it really stuck in our mouth in a claggy way. It was tough going.

A very creamy looking nut butter with a glossy finish and warm nutty aroma. An honest dry roast character is immediate making a bold impact on the palate. A clean consistent flavour with warm and rounded roasted nut richness with the salt supporting the nut butter and lifting the flavours to result in a luxurious and balanced taste. A really good and honest butter produced very well.
